PROJECTS

https://github.com/VeronikaLitvinovic

Routing (React)

A multi-page React application using an external API and react-router-dom. Users can view the list of users, detailed information about users, photo albums and photos.

Lamoda (React)

The Lamoda project is an online store with filtering and sorting of products. Filters by substring, color, and category. Sort by price and rating.

TODO List (React)

Implementation of TODO List with an input field, adding, deleting and filtering tasks, as well as with the ability to sort.

Notion (React)

A multi-user application for creating and managing notes. Users can create, delete and edit their notes. The Tailwind CSS library is used for styling.
